My dear Miss Lucy,

The elegance and beauty of the bat you so graciously have presented to me suggests memories of the donor in after, but I think not brighter days. I shall preserve it with great care, and fondly wear it in remembrance that Patriotism may teach the industrious arts more perfectly than love of gain.

Supported, and cheered as we are by women who have taken Solomon's picture of the virtuous woman "whose price is above rubies" for their model. "Who seeketh wool and flax, and worketh willingly with" their "hands" the tide may ebb

for a little while, but only to flow stronger in the flood of success.

Mrs Davis joins me in kindest remembrance to you and with many thanks for your kind wishes, and complimentary expressions.

I have the honor to be

Captain -

The Brig Genl Comdg directs as follows -

1st Your first work at Sugar Loaf will be to prepare abattis & chevaux de frise in front of the lines of the entrenched camps - These lines should occupy the hills from the Sugar Loaf to the Telegraph road & back to the river - The hills on the S. side may be occupied with redoubts connected by lines of rifle pits & prepared for field Artillery - Generally when the summit is sufficiently large & level for a redoubt it will be enclosed & prepared for field artillery -

2nd Let the lines be laid out & well marked - Must be prepared, but do not break ground until the arrival of troops - Encampment of the troops should be on the interior slopes of the range of hills -

3rd Ascertain if lighting can be brought to the Sugar Loaf Wreck at high water -

4th The roads should be trimmed out, leaving the

add easy a screen towards the river + the Ground to get a fair view within rifle range from the lines –

VI Be careful to make the lines mutually support each other –

VII Make a good sketch of the range of hills –

VIII The Detachment of Engr Co now at the Ground will be sent to you. Until arrival of Infty will guard the negro camps –

IX Don't allow wanton destruction of fine wood or of that which will be required for use – Do not allow any wood to be cut in – side the parapet line – Until occupied defend by the Camp of the working parties + of the Infty should be outside – Part of the working might be in Battery Gallois on the Ground –

Captain,

You will put a detachment of wood cutters opening an infantry communication from Gatlin Battery towards the Fort along the skirt of the woods & swamps. The communication to be as near the beach as practicable, but to afford a screen to hide the movements of troops from the view of vessels. Wherever practicable advantage will be taken of sand hills or dunes. At the same time an Artillery road will be opened as nearly parallel to the infantry communication as practicable & generally following the skirts of the higher sand woods. A party should at once be put endeavoring to bridge the swamps between our two roads. From this Artillery road to the Infantry Communication frequent lanes should be cut especially where the thicket is close.

A Secret road will be opened from the Sugar Loaf entrenched Camp to Gatlin Battery.

At Battery Gladden an advanced

works to Fort Fisher is to be built.- It will consist
of half bastioned front on the sea face- of some
125 yds between salients, and a depth of about 100
yards- It will be necessary, when this work is
commenced to push it on rapidly. It is better
therefore to commence at once cutting palisades
& prepare turf or sods before hand.- A drawing
of the work will be furnished you soon.-

The road from Sugar Loaf to Battery
Anderson, altho' called Direct, is to be built as Directly
as practicable being governed by the nature of
the ground.-

Captain,

I sent you a drawing for Fort Ransom - Already I shall have to modify it - Not having a plat of the ground I designed it principal only - The N. Front ought to be held at the same height & thickness of parapet as the Sea front. & the Bastion N.W. to be increased especially on the flank - I will indicate these alterations to you when I come down -

A light line of infantry breast works ought to be put up stretching, on the inside of the bend, or about 300 yds from the beach, from Ransom's line to near that part of the woods he laid me of late - That point might be chosen for a landing -

Call Col Gaskins attention to orders prohibiting brick burning just outside the Camps at Surgeon Gen'l.

The Abbatis on the outer slopes should not be used for fire wood - All that should be cut from the woods outside -

Very Resp't.

Near Greensboro N.C. April 26th 1865

By the terms of a military convention made on the 26th inst by Maj. Gen. W. T. Sherman U.S. Army and General Joseph E. Johnston C.S. Army the officers and men of this Army are to bind themselves not to take up arms against the United States until properly released from that obligation, and shall receive guarantees from the U.S. Officers against molestation by the U.S. Authorities so long as they obey that obligation and laws in force where they reside. For this object duplicate Muster Rolls will be made immediately and after the distribution of the necessary papers the troops will march under their Officers to their respective States, and there be disbanded, delivering General Property.

The object of this command is pacification to the extent of the authority of the Commander who made it.

Events in Virginia which broke every hope of success by war, impose upon the General the duty of sparing the blood of this gallant Army and saving our country from further devastation and our people from ruin.
